

# A Patient's Guide: Adding Additional Family Members to a MyCareCorner Registered Account

If you have registered or have an existing MyCareCorner account, you can then gain access to health records for your family members (spouse, children, and/or parents) with an invitation from the provider (hospital or clinic). Use the invitation link to select the health record to associate with your account.

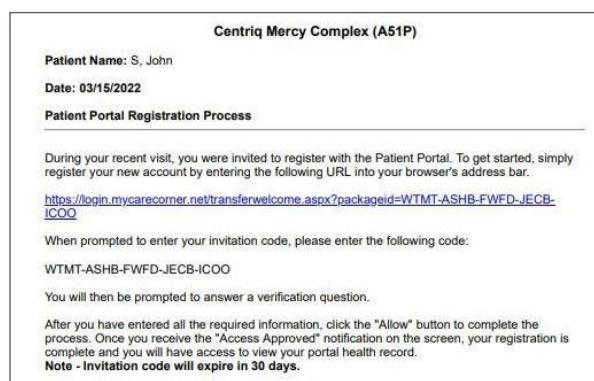

*It is important to note that multiple patients can be set up under one account (or email address/password combination) so that spouses and/or children can be accessed from a single account holder.*

1. Once you receive the registration invitation for MyCareCorner, click the link in the email or enter the URL (from the printed invitation) into the address bar of your internet browser.
